

Christopher Evans is Director of the Rehabilitation Medicine Research Center at the Mayo Clinic where he is Professor of Orthopaedic Surgery, Physical Medicine and Rehabilitation. He is also the Maurice Müller Professor of Orthopaedic Surgery Emeritus at Harvard Medical School.

Dr. Evans earned his BSc in genetics and microbiology and PhD in biochemistry at the University of Wales, United Kingdom. He completed a postdoctoral fellowship in molecular biology at the Free University of Brussels, Belgium. Subsequently, Dr. Evans earned a MA in the history and philosophy of science at the University of Pittsburgh and a DSc degree from the University of Wales. He has an honorary MA from Harvard University.

His research covers two main areas: arthritis and regenerative medicine applied to bone, cartilage and other tissues of orthopaedic interest, with an emphasis on gene therapy and clinical translation. Dr Evans developed and led the world's first clinical trial of arthritis gene therapy.

Dr. Evans is a Past-President of the Orthopaedic Research Society and is a Fellow of the Royal Society of Chemistry, the Royal College of Pathologists and International Orthopaedic Research. He has received a number of awards, most recently the 2018 Distinguished Investigator Award of the Orthopaedic Research Society. He was recently elected a Fellow of the Learned Society of Wales.
