

Julien Paul Troillet, Dr.med.vet.

Julien Troillet currently works as an industrial veterinarian with a company producing medical devices (Orthokine®vet irap). His field of work includes product management and marketing of devices used for autologous blood therapies (irap ACS, PRP). One of his main interests is the communication and connection between industry and scientists in order to actuate research in the field of autologous blood therapies and regenerative medicine for animals.

After beginning his studies in Budapest he qualified as a veterinarian from the University of Leipzig in 2005. For three years he worked as an assistant in a private equine clinic in Munich, Germany. From 2008 he took on several positions as equine veterinarian in the UK for two years. In addition to his practical work he wrote a thesis on MRI of the equine growth plate resulting in a Dr's degree.
