

Peter Wehling, MD, PhD

Dr. Peter Wehling is founder and Co- Director of the "Center for Molecular Orthopaedics and Regenerative Medicine (CEMOR)", in Düsseldorf, Germany. He is an adjunct Professor for Orthopaedic Surgery at the University of Düsseldorf, Germany as well as at the University of North Carolina, Chapel Hill, USA. Furthermore, he is founder and CEO of the "Foundation for Molecular Medicine" and of Orthogen AG, Düsseldorf, Germany. Dr. Wehling is a clinician-scientist with a research focus on inflammation, cartilage destruction, disc prolapse and pain. A new target of his work is based upon clinical strategies to extend health span. Dr. Wehling developed the Orthokine and Regenokine Program. He was one of the first scientists in applying gene therapy to joint disease in cooperation with Prof. Chris Evans, Mayo. His clinical practice focuses mainly on sports related diseases, OA, spinal diseases and chronic pain syndromes. Dr. Wehling is the treating physician for a wide range of top athletes from NBA, NFL, MBA, DFB, soccer, tennis, golf and olympic athletes from all over the world.
