

Piotr Kowalczyk

DVM, passionate of orthopedics, surgeon in 8 veterinary hospitals around Poland. In 2013 started PhD studies at the Department of Surgery and Anesthesiology of Small Animals in Warsaw University of Life Sciences. His particular interest are orthopedics of small animals, traumatology, corrective osteotomies, minimally invasive surgery (including arthroscopy), regenerative therapies such as autologous conditioned serum and others. Eager to gain knowledge and extend skills, thus he actively participates in numerous trainings, e.g. ESAVS courses (Orthopedics of small animals), cooperates with best in class surgeons and is greatly open to face challenging surgical opportunities. Ahead of him is veterinary mission to search on (new) methods and solutions bringing effective relief to his small patients. Willing to share knowledge resulting in scientific publications (author and co-author) and lectures (e.g. international VEPR 2015, 2nd International Seminar on Regenerative Medicine and Orthobiology "Biology - Engineering - Therapy" POZNAŃ 2017), poster at the upcoming 5th World Veterinary Orthopaedic Congress/ 19th ESVOT congress, September, 2018).

Privately a happy father of 2-year-old girl to whom he describes anatomical pictures.
